SUMMARY

Artificial Intelligence (AI) Engineer Intern and B.Tech IT graduate who builds Python backends and LLM-powered tools. Currently automating finance, sales, GTM and revenue-management workflows with AI agents and tool calling. Ships end to end: Flask REST APIs, SQL databases, RAG pipelines and Streamlit dashboards.

EXPERIENCE

AI Engineer Intern — Aug 2026 – Present
Mondee Tech Pvt Ltd

- Automate manual internal workflows across finance, sales, GTM and revenue management using AI agents and internal tool calls.
- Collaborate with **global teams and stakeholders across different regions** to define and shape requirements for AI agents, then build, review, and continuously refine each agent through iterative feedback.

Virtual Intern — Feb – Apr 2026
Infosys Springboard 6.0

- Built Smart Stock, a Flask inventory management system with REST APIs and JWT authentication.

AI & ML App Development Intern — Dec 2024
Velozity Global Solutions

- Designed and enhanced an AI voice assistant that processes speech and answers user queries using machine learning.
- Explored TensorFlow for AIzheimer's disease prediction models.

Image Processing with OpenCV — Feb 2024
NSIC

- Applied OpenCV computer vision algorithms to analyze images, reaching 98.7% accuracy.

Technology Job Simulation — GitHub ↗ — Jul 2025
Deloitte Australia (Forage)

- Completed coding tasks and wrote a proposal for a data dashboard.

PROJECTS

FinGenius – AI Financial Insights ★ — GitHub ↗
Python · Streamlit · GPT

- **Generates portfolio insights with a GPT LLM** and rule-based stock evaluation.
- Interactive Streamlit dashboard for risk and performance analysis.

ContextIQ – RAG Chatbot — GitHub ↗
Flask · LangChain · Chroma · Groq

- Retrieval-augmented chatbot that ingests CSV and PDF files and answers from that context with a Groq-hosted LLM.
- HuggingFace embeddings stored in Chroma for semantic search.

Care Connect – Hospital Management — GitHub ↗
Flask · SQLite · Cloudinary

- Role-based access for admins, doctors, patients and lab admins, with password hashing.
- Appointment booking, slot management, patient records and medical scan uploads.

Digital Parking System — GitHub ↗
Flask · SQLite · REST

- Backend for vehicle entry, slot booking and billing; automated slot allocation and billing to cut manual effort.

ACHIEVEMENTS

- **12th of 8,864** in CodeQuezt #26 (Naukri).
- **181st of 30,000**, score 99.96, in Naukri Young Turks 2025.
- **Global rank 14,301** in TCS CodeVita Season 13.
